

# Norguard Mining Industry Solutions

*Designers and Manufacturers of Fall Protection Equipment*

## Norguard's Patented Back Pad

Norguard Industries was founded in October 1989 by Norm Desjardins after recognizing the need to add protection, support and comfort to existing miner's belts. Working at the mine himself, Norm saw firsthand the discomfort workers felt after hours of operating. This combined with industry concern over safety protection sparked the solution that now forms the foundation of the Company.

The Norguard patented back pad remains as impressive today as when it first launch over 20 years ago. Made of leather and nylon this durable addition to any belt provides lasting comfort and support.

N1433 - Norguard Back Pad (S-M-L-XL)

## Norguard Miner's Belt Features and Benefits

- Stainless Steel Grommets
- PVC buckle keeper - retains strength and will not break or crack in harsh environments
- Black high grade belting lamp straps provides strength and exceptional resistance against moisture, and most chemicals
- D-ring, minimum tensile strength 5000lb, 22.3kN, 100% proof loaded @3600lbs 16.0kN
- Constructed of high tensile polyester 2"webbing with a tensile strength of 12000lbs. Available in black or Rhino Grey
- Constructed to maintain longevity in the harshest environments
- Extensive testing and research in the development process, earning user confidence for over 20 years
- Available in many selective styles and options

**Note: Industrial belts are to be used for travel restraint applications only**

Meets ANSI and OSHA requirements

## Norguard BioSeal Miner's Belt

Norguard offers several types of belts to accommodate variations in work environments. For harsh environments with intense conditions, Norguard's **BioSeal** products provide a specially formulated coating on the webbing that wipes clean and outlasts regular safety webbing 3 to 1.

- ✓ 95% cleanable with liquid soap and water
- ✓ Highly resistant to cuts
- ✓ Good resistance to abrasions
- ✓ Good resistance to all sorts of chemicals

## The Original Rhino Miner's Belt

For those who require tough belts without the protective coating, Norguard offers the **Rhino Belt** manufactured with heavy duty webbing that boasts a 12,000lbs minimum breaking strength.

Available in Rhino Grey or black.

## Norguard PVC Toolbelts

This toolbelt is constructed of hard wearing brown PVC with 1 lamp strap and 1 rescue strap. Norguard PVC toolbelts are first choice when working in industrial and chemical environments.

- ✓ high tensile strength
- ✓ good resistance to all sorts of chemicals
- ✓ high abrasion resistance
- ✓ lightweight
- ✓ tear resistant
- ✓ long life expectancy
